X510

Dual-Cellular Bonding Network Router

POWERED BY
Speedify

Fast, Reliable Internet Anywhere

In today's digitally dependent world, reliable internet connectivity is a necessity. Yet many people still face frequent internet outages, slow speeds and inconsistent service, which all lead to frustration, lower productivity, and even lost income.

The **Miri X510** bonding router overcomes this challenge. It combines up to seven internet links to bolster reliability and maximize performance for use cases ranging from the rigorous demands of high-profile live event streaming from remote venues to reinforcing business continuity for enterprises and remote workers.

Bonding-fueled benefits

Fault-tolerant resilience
Leverage multiple connections to keep you connected if one internet service provider fails.

- Combine wired, Wi-Fi and mobile connections for resilience
- Automatic failover to ensure seamless connectivity
- Bond 5G and LTE to overcome network congestion in crowded venues

Battery-powered portability
Take the Miri X510 with you on the road.

- Dual slots for NP-F batteries (not included) enable use where no power outlet is available
- Compact form factor fits easily in a backpack
- Ideal for uses like on-location live streaming production

Faster speeds
Channel bonding forges multiple internet links into a single, faster connection.

- Combine up to 7 internet connections to increase performance
- Increase bandwidth even more with Speedify Pair & Share technology
- Achieve faster speeds even in remote areas with poor mobile coverage

Safe and secure
Speedify bonding technology works like a VPN to keep your data safe from hackers and snoops.

- Traffic is secured using AES-256 encryption
- Choose your preferred Speedify server location for your data sovereignty needs
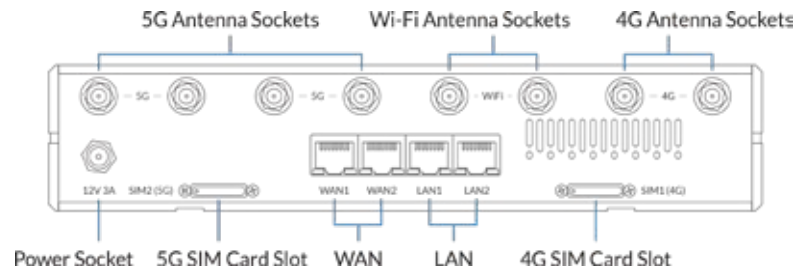

Integrated Speedify technology

The Miri X510 router is the only hardware solution that integrates Speedify's proven channel-bonding technology to deliver fast, resilient, secure connectivity.

- Speedify subscription required for network bonding (first 3 months included free*)
- Unique Pair & Share feature lets you easily share data connections from mobile devices on the same network via the Speedify app
- Connect to any of Speedify's dozens of server locations worldwide (automatically based on latency and availability, or choose manually)

POWERED BY
Speedify

Bond up to 7 network links simultaneously

- 1 x integrated 5G modem (SIM card not included)
- 1 x integrated 4G modem (SIM card not included)
- 2 x RJ-45 Gigabit Ethernet connections
- Wi-Fi 6 connection
- 2 x USB modems (modems not included)
- + further expand bandwidth with Speedify Pair & Share
